(panic!)

WHATEVER HAPPENS...

DON'T PRUNE!

docker
system

`$df -lh` (diagnose)

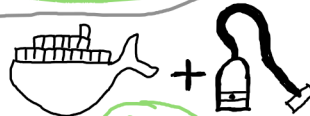

Filesystem	Avail	Use%
/	100M	99%

`$sudo ncdu -x /`
199 GiB [###] /var/lib/docker

`$docker system df`

	SIZE
Images	117 GB
Containers	3 MB
Local Volumes	25 GB
Build Cache	57 GB

stands for
"disk usage"

3.2

`$docker run --detach --restart=unless-stopped
--volume=/var/run/docker.sock:/var/run/docker.sock
--volume-docuum:/root
stephanmisc/docuum
--threshold=40GB`

LRU Eviction of
Docker Images
Least Recently Used

(fix)

(clean)

① `$docker container prune`*

② `$docker volume ls`
`$docker volume rm [...]`

③.1 `$docker image ls`
`$docker image rm [...]`

④ `$vim buildkitd.toml`
[worker.oci]

cool people don't prune
awesome people garbage collect

gc = true

maxUsedSpace = "40GB"

minFreeSpace = "5GB"

ffck Webpack!

max-parallelism=4

`$docker builder create`

--use --name=awesome

--driver=docker-container

--config=./buildkitd.toml
